Educational/Training Support

Project Number: HRSA 16-070

Status on Grant: Co-Investigator (Lead Faculty)

Approved Project Period: July 1, 2016-July 1, 2019

% Effort: 45%

PI: Iris Padilla, PhD

Source: HRSA

Annual Direct Costs: 400,000

Title of Project: Communities of Practice (CoP)

Project Goals: : 1) create a collaborative model (Communities of Practice or CoP) with mechanisms to build and sustain partnerships between academic centers and clinical practice sites;2) develop and support clinical preceptors in preceptor preparedness, clinical knowledge, and scholarly endeavors within the CoP framework; 3) expand educational preparation for primary care advanced practice nurses (APNs) by advancing knowledge through a diabetes/endocrinology concentration within DUSON MSN program; 4) prepare and graduate culturally and ethnically diverse FNP and AGNP with the theoretical knowledge and skills to provide primary care and manage MCC in underserved ethnic groups in rural and community healthcare settings.

Title of Project: Breakfast Nutrition and Inpatient Glycemia

Project Goal: A comparison of current standard of care meals versus new menus (in which we redistributed the macronutrient content to de-emphasize carbohydrate- and encourage protein-content) was conducted. We hypothesized that the new menus will lead to an improvement in inpatient glycemic control, which can decrease incidence of infection and potentially shorten length-of-stay

Title of Project: Daily Tadalafil and Gastric Emptying Time in Diabetic Gastroparesis

Project Goal: We hypothesized that in adult patients with diabetic gastroparesis with established Type 1 diabetes ($HbA1c \leq 10.0\%$), 7 days of daily tadalafil use will significantly improve gastric emptying compared to baseline as measured by gastric emptying time.
